

# Symétrie

## SC-8S

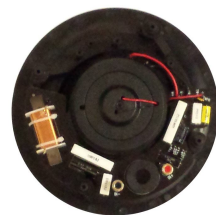

Today, Architectural Audio is blending more and more into the home environment, being less apparent and more invisible is the ideal.

Such is the reason for the Solus "Symétrie" Architectural Audio Series.

Designed with Edgeless white out covers and small hole perforated grills that cover the complete speaker, "Symétrie" models are edgeless and simply become a part of your wall or ceiling. With an ultra thin grill cover held on tightly by internal magnets, they are also easy to coordinate with any wall color used and install for a blended seamless look.

Make no mistake, not being just a pretty face, to compliment such desired aesthetics, product performance is unmatched in their price/performance category for your home theater and whole house audio needs. Shallow-placed drivers minimize early reflections, improving accuracy, particularly off-axis response. This is one of the major keys to the overall sonic performance of this design.

### Components / Features

- 1" Silk Dome Tweeter
- Tweeter Crossover: 18db/octave with Thermal Activated Protection network
- 8" Co-Polymer Woofer, 1.5" Voice Coil
- Woofer Crossover: Open-slope 6dB/per octave with impedance compensation network, 18 gauge low resistance-high damp coils
- Frequency Response: 45Hz - 20kHz, -3dB @ 40 Hz  
30 deg. of axis: 45Hz - 18kHz, -3dB @ 40 Hz
- Sensitivity : 87dB 1M/2.83 volts input
- Nominal Impedance: 8 Ohms, lowest 7.1 Ohms
- 11 1/2" Outside Diameter, **Cutout Dimension: 9 7/8"**

### Lifetime Limited Warranty

All Solus Architectural Speakers have a Lifetime Limited Warranty. This warranty includes parts and labor repairs on all components found to be defective in material or workmanship under normal conditions of use. This warranty shall not apply to products which have been abused, modified or disassembled. Products to be repaired under this warranty must be returned to Solus or a designated service center with prior notification and an assigned return authorization number (RA).
